 Sugar
 Margarine
 Eggs
 Flour
 Cherries
 Nuts

Instructions for using "Cake Bake" quiz scoring method

Set up the title and the 12 squares on the board with one of the 12 ingredients hidden randomly behind each. Decide which side will make which cake. As each side correctly answers a question, they choose one of the 12 squares available. If it has hidden behind it an ingredient they need, it is put up under their recipe card. If it is one they already have, or if it is one needed by the other side, it is put back under the square. The first side to gather all six ingredients is the winner.
