

FRAUD SQUAD

Instructions for using "Fraud Squad" quiz scoring method

Set up the 12 squares with one of the the 12 bank notes behind each. As each side correctly answer a question they choose a number between 1 and 12. Before the square is removed they must decide whether to keep the bank note or pass it to the other side. If they keep it, it is put up on their side of the board. If they pass it, it is put up on the opposite side. At the end of the quiz, add up the positive numbers and take away the negative ones (fake notes) to obtain a final score. An alternative way is simply to pick a square and all keep whatever bank note is under it. However, this method is less exciting.
