

Instructions for using "Motor Races" quiz scoring method

Set out the four races as above and hide the 12 trophies under them at random. As each side correctly answers their question, they choose a race and a car in that race, e.g. "Isle of Man T.T. middle bike" etc... Place the trophy they get on their side. Each trophy has on it a position and the respective number of points scored. The winner is the team with the most points at the end.
